IWC Tax Exempt Individual Supporter Opportunities

Wildlife Enthusiast,

As a non-profit organization, the International Wildlife Crimestoppers is dedicated to reducing the illegal taking of North America's fish and wildlife resources through the exchange of information with anti-poaching organizations at international, national, regional, and local levels. Report-A-Poacher, Operation Game Thief, and Turn in Poachers coordinators from the United States and Canada meet annually to discuss new ideas and successes of these programs, enabling provinces and states to improve and protect our fish and wildlife resources. Our objective is to provide support for our members, both financially through a grant program for projects targeting wildlife crime as well as support through media, information and any other formats. With these in mind, we respectfully ask for your individual support by making a donation to International Wildlife Crimestoppers.

Organization Objectives

1. To encourage the collection and exchange of information on natural resource crimes for other agencies and organizations.
2. Education of our youth on the responsible use of our wildlife resources and of their responsibilities as the future stewards of those resources.
3. To provide information and education for the members and the public on reporting and preventing natural resource crimes through outreach to ALL wildlife stakeholders through outreach and strategic partnerships with dedicated wildlife related non-governmental organizations (NGO's). This includes encouraging and promoting close cooperation between civilian organizations, NGO's and natural resource law enforcement agencies to recognize and reduce natural resource violations through the use of crimestopper programs.
4. To assist in developing training programs and funding ideas for programs for the apprehension of natural resource violators. We look to create force multipliers with all of our programs.
5. Support for all jurisdictions to gain valuable knowledge at an annual training conference. The more information we share, the more poachers we catch!
